LIMITED EDITION PRINTS

The prints are produced by a master printer using the highest quality pigments and paper. These archival materials, coupled with techniques developed over many years, provide the finest prints available. Unlike the limited life span of other print methods, this print can last a lifetime without noticeable fading, if treated like any valuable piece of art. Do not place it in direct sunlight or in a high humidity location. Be aware that the colors may vary a bit from what you see on your computer screen. It is recommended to enlarge the overall size with a matting of your choice.
